

RISK ASSESSMENT FOR GO APE NETS KINGDOM

SUBJECT: Nets Kingdom	Dated: February 2019	RISK ASSESSMENT NUMBER: NK/BP/001
Reviewed by: Operations Team / BP Site Team / Health and Safety Manager		REVIEW DATE: January 2020

Assessing risks is simple in principle. It involves identifying hazards or examining what in a particular situation could cause harm or damage and then assessing the likelihood that harm will actually be experienced by a specified population and what the consequences would be (i.e. the risk). The overall objective is to obtain a view on how to manage the risk or to compare the risk with other risks. At a conceptual level, it has proved useful to make a distinction between an assessment of the risks (the evaluation of the likelihood of harm and its consequences for populations or individuals as described above) and risk control (the prioritisation of risks and the introduction of measures that might be put in place to reduce, if not prevent, the harm from occurring). This stems from the belief that an assessment of risks by and large can be scientific and objective but risk control less so because it integrates the results of an assessment of risks with other critical inputs. (www.hse.gov.uk/risk)

Step 1. Identify the Hazards.

Step 2. Identify “Who may be harmed?”	Course User	People who are taking part in the High Wire Activity Course
	Employees	Full time, seasonal and freelance instructors, and any head office staff.
	Public	The general public who are not actually taking part in the course (spectators or forest users).
	Contractors	People working for a company or individual contracted by Go Ape to work on or around the course, etc.

Step 3. Evaluate the Risk.

LIKELIHOOD

Very low	Definitely will not happen
Low	Unlikely to happen
Medium	Moderate chance of accident happening
High	Quite likely to happen
Very high	Likelihood will happen

CONSEQUENCE

Very low	Injury very insignificant i.e. splinters
Low	Injury fairly minor i.e. minor cut, grazes, bruising
Medium	Injury would stop casualty continuing with task.
High	Serious injury requiring medical assistance i.e. sprains/strains, broken bones, lacerations
Very high	Very serious injury or possible fatality

Step 4. Existing Control Measures ². These are the measure we have put in place to keep the risk to an acceptable level. The Residual Risk (RR) is the level of risk that remains after putting all the control measures into practice.

RESIDUAL RISK

Very low	Minimal risk, control measure more than necessary
Low	Control measures satisfactory
Medium	Control measures adequate
High	Control measure requires constant supervision. Re-assess situation
Very high	Control measures inadequate. Stop activity

Step 5. The Review Process. Go Ape risk assessments will be reviewed when it is suspected that the assessment is no longer valid or there has been a significant change. In addition, they will be thoroughly reviewed annually.

RISK ASSESSMENT FOR GO APE NETS KINGDOM

Go Ape risk assessments are written in compliance with the Management of Health and Safety at Work Regulations and in accordance with HSE’s 5 Steps to Risk Assessment. The assessments are reviewed when it is suspected that the assessments are no longer valid or there has been a significant change. They are also reviewed annually. Go Ape recognises that risk assessments are fundamental in ensuring a safely run Adventure Course. By continuous and dynamic assessment of risk by all Go Ape staff, adhering to the Go Ape operational and training systems¹, risks are reduced to a reasonable level. To carry out daily risk management all staff must be able to fully understand the Risk Assessment procedure as detailed above.

This Risk Assessment is produced in accordance with the Chartered Institute of Environmental Health “Risk Assessment Principles and Practice” programme. This risk assessment looks at the risks associated with the Go Ape nets courses. The assessment refers to the Go Ape operational and training systems¹. **If you identify any additional foreseeable risks or have any ideas on how this Risk Assessment can be improved, or identify further control measures please provide feedback to info@goape.co.uk.** Thank you.

SER	HAZARD	LHD	CON	WHO MIGHT BE HARMED	EXISTING CONTROL MEASURES	FURTHER CONTROL MEASURES	RR
001	Net Failure/Defects <ul style="list-style-type: none"> • Incorrectly maintained • Falling Objects • Weather • Vandalism • Day to day use • Tree Issues • Pest damage (Squirrels) 	V. High	V. High	Staff, Customers and Spectators	In accordance with the manufactures guidance the equipment will be inspected and maintained at designated intervals and additionally in line with Nets Kingdom operating procedures, which will include: - <ul style="list-style-type: none"> • Daily Opening Checks • Checks during operation • 3 Monthly Checks • Annual Inspection • Annual Tree Inspection by qualified aboriculturalist Checks and Inspections will be carried out by trained staff and logged accordingly <ul style="list-style-type: none"> • Inaugural Inspection Damaged equipment will be replaced or repaired where necessary in accordance with Manufacturers Guidance. Safety Rules – No Smoking is permitted in the nets All trees used have been inspected prior to build by a qualified arboriculturalist.	Pest Control measures, Squirrel scarers	Med
002	Unauthorised Access <ul style="list-style-type: none"> • Overnight • During Operation 	High	High	Intruders, Staff, Customers and Spectators	The activity has been designed and constructed so that all access points during normal operation are raised up or having closing doors (climbing tower) to prevent access points when the course is not open. Entire area is enclosed with 6ft fencing to prevent access during operational hours by anyone who hasn’t signed in as a participant or spectator.	Benches secured down to stop them being used to facilitate overnight access.	Med.

Refs	OD = Go Ape Operational Documents; exact titles of documents may change from time to time HSW Act 1974, MHSW regs amend 1999, WAH regs 2005, PUWER 1998, LOLER 1998, PPE regs 1992, Workplace HSW regs 1992, H&S (Safety Signs) regs 1996, First Aid regs 1981, Occupiers Liability Act 1984, HSE 5 Steps to Risk Assessment INDG 163, HSE A Guide to Risk Assessment requirements INDG 218, EN 15567-1:2015 (Construction and safety requirements) and EN 15567-2:2015 (Operation requirements)
------	---

Notes: Control Measures - Where a control measure has been identified, it is only included once and not repeated under every serial number. Therefore, for a specific hazard identified, a control measure in a serial above may apply to that hazard. (HSE RA guidance.)

1. Go Ape training package. These include the following: Go Ape Operations Manual (OD) and Appendices on how to run a Go Ape course, Go Ape Online Training / Manual (TM), including training and assessment policy and training objectives, generic PowerPoint presentations and training videos, Go Ape Duty Manager Training (DMT), Go Ape Rescue Package (RP), Go Ape Company Handbook and further library documents listed in the Go Ape document library (OD).
2. Control Measures. Where a control measure has been identified, it is only included once and not repeated under every serial number. Therefore, for a specific hazard identified, a control measure in a serial above may apply to that hazard. (HSE RA guidance.)
3. Instructors Training. Go Ape instructors must pass through a full training and assessment programme before they can instruct on Go Ape. They undergo training in accordance with the Go Ape training package, training and assessment policy and training objectives which includes the delivery of safety instruction, operational limits on the use of the course, course inspections during daily course opening and closing, supervision and patrolling techniques, personal protective equipment, harness fitting and inspection, emergency operations, health and safety and customer care. Instructors are First Aid trained. Only instructors with the correct aptitude are selected for additional training in rope rescue techniques. Training and assessment of rescue trained instructors is only carried out by our trained and qualified persons, who have been formally assessed as competent to do so by the Operations Manager responsible for training. Duty Managers complete an additional Duty Manager Training package. Site Managers attend annual Managers Training and quarterly Managers Meetings where they are updated on any operational changes including training requirements.
4. Consultation with paramedics from the local ambulance service and HART team validated the Nets Kingdom emergency first aid and stretcher procedures.

RISK ASSESSMENT FOR GO APE NETS KINGDOM

Update History

Date	Update By	Summary
24/7/17	Rob Davies	Final Version complete
9/8/17	Rob Davies	Removed balls from falling objects and climbing of walls as both are unlikely to happen and therefore remove control measures in Safety Brief to ensure rules are clearer
31/8/17	Rob Davies	Addition of "Falling Objects to Net Failure/Defects following incident 26/8/17
18/01/18	Mark Elliott	Addition of additional control measures and adjusted values.
19/01/2018	Operations Team	Team review of content and update.
