

WHY WILL TREE TOP JUNIORS DEVELOP PUPILS' KNOWLEDGE AND UNDERSTANDING OF ENVIRONMENTAL ISSUES?

Children will have an amazing experience on the Junior Tree Top adventure which is located in some of the UK's most valuable and beautiful environments. We take our responsibility to care for these areas seriously. When designing a course we work closely with specialists to make sure it has the lowest possible impact on the forest.

GO BITESIZE

- Explore the ICUN Red list threatened species.
- Explore the WWF website and search for Gorilla.
- Explore the Go Ape website on environmental issues.
- Gather photographic evidence from the Tree Top adventure trail which supports sustainability. For example the landing platforms are made from recycled wood peel and nothing is bolted to the trees.
- Identify new habitats which have been created as a result of Go Ape's tree top adventure. For example nesting birds underneath the platforms.

GO PROJECT

Design a web page which links to our Go Ape website or design a leaflet which helps raise awareness of the gorilla's loss of habitat. As part of the challenge children could raise awareness through a whole school assembly and link their work to the school's website or newspaper.
